

Parallel Mining is Focused on the Development of Two High Grade Gold Exploration Projects in Burkina Faso, West Africa

www.parallelmining.com TSX-V: PAL

With a focus on West Africa, Parallel Mining Corp.'s (TSX-V: PAL) objective is to explore and develop high value, high potential advanced gold projects, primarily located in West Africa. The Parallel Mining team of mineral exploration professionals is lead by John Anderson, an experienced junior exploration expert who has been instrumental in founding and leading a number of successful public resource companies. He is complemented by Parallel Mining's team of senior mining professionals who collectively have over 100 years of resource sector experience and include several geologists, as well as investment industry analysts.

The Garsay Gold Project is a highly prospective gold discovery, located adjacent to a 4.53 million ounce gold mine

The Garsay Gold Project – Over 100 Square Kilometres

In 2010, a subsidiary of Newmont Mining undertook a systematic exploration program, including ground geochemistry, geophysical surveys and trenching. This highly successful exploration identified a gold anomaly which could be traced over 1500 meters north to south and 500 meters east-west, and supplemented by 1467 meters of Air Core drilling, 9407 meters of Reverse circulation drilling and 1508 meters of diamond drilling.

A 2015 Rotary Air Blast Drilling campaign – consisting of 1062 meters over 17 holes – to test near surface strike extensions of mineralized zones identified by Newmont also had significant results. The RAB program demonstrated that the mineralized structures identified by Newmont do extend along strike, with the potential for other parallel structures also existing.

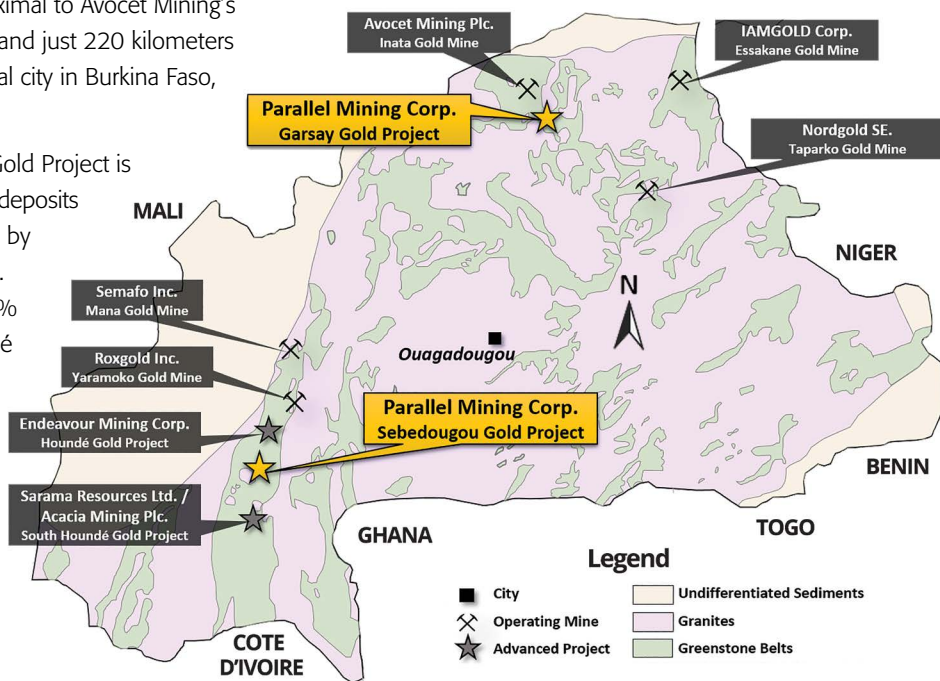

(continued on reverse)

The Garsay Gold Project encompasses a total area of 165 square kilometers. This project is proximal to Avocet Mining's 4.6 million ounce Inata Gold Project and just 220 kilometers northeast of Ouagadougou, the capital city in Burkina Faso, West Africa.

The 100.08-square kilometre Sebe Gold Project is located between the producing gold deposits Houndé and South Houndé operated by Endeavour Mining and Acacia Mining. Parallel holds the right to earn a 100% interest in this property in the Houndé Greenstone Belt.

The positive initial results from Sebe and the numerous high-grade gold intercepts recorded at Garsay give Parallel Mining a strong portfolio in Burkina Faso.

Gold Mining and Exploration Property Locations in Burkina Faso, West Africa

The Sebe Gold Project – Strategically Located

Located between Endeavour Mining's Houndé Project and Acacia Mining's South Houndé deposit, the Sebe Gold Project is in the Houndé Belt in southwestern Burkina Faso. The Houndé Belt is considered a world-class, highly prospective region for gold mineralisation. Parallel Mining is the first company to conduct

commercial exploration on the Sebe Permit, and greenfield opportunities in this prolific belt are highly sought after. Recent discoveries in this belt including Sarama/Acacia's South Houndé Project, Roxgold's Yaramoko mine, Endeavour's Houndé deposit, and Semafo's Mana mine confirm the potential of the belt to host multiple types and styles of gold deposits.

Artisanal mining is active on the Sebe Gold Project and covers a strike length of over 500 metres. Historical information indicated that samples taken at the bottom of artisanal mine shafts assayed between 3.0 and 6.6 grams per tonne (gpt) gold in seven of the nine shafts tested. Eight surface grab samples taken in the vicinity of these shafts assayed between 2.9 and 7.8 gpt gold.

The Sebe Gold Project is located in the Houndé Belt – considered to be a world-class, highly prospective region for gold mineralisation

Experienced Management

John Anderson, CEO, President & Director – Has a wealth of public company experience. Over the past 25 years he has been instrumental in founding, helping found and managing numerous public resource companies. He has successfully raised over \$500 million in equity.

Allan Fabbro, Lead Director – Has over 30 years' experience in the finance and mining industries, and was Lead Director of Roxgold raising in excess of \$60 million in financing during his tenure. He headed retail trading at Yorkton Securities; Yorkton's Natural Resources Group; and specialized in the natural resource sector with Canaccord Capital.

Stephen J. Wilkinson, B.Sc., M.Sc. Geology, Director – An experienced mining executive, consultant and director, and currently President & CEO of WPC Resources Inc. and Falcon Gold Corp., and Chairman of Centurion Minerals Ltd. Past positions include President of ValGold Resources, and Chairman of NovaDx Ventures and HMZ Metals.

Robert Sibthorpe, B.Sc (Geol), MBA, Qualified Person – Has extensive experience in the mineral exploration with senior companies including Noranda, Falconbridge and Ivanhoe Mines. He was a corporate finance analyst with Midland Doherty, Yorkton Securities, and Canaccord Genuity. As President of Roxgold, he pioneered a new geological model in Burkina Faso, resulting in the discovery of the high-grade Yaramoko gold deposit.

Matt MacKenzie, JD, MBA, Vice President, Legal Affairs – He began his career in finance with GE Capital and BMO Capital Markets, where he worked directly with clients in diverse fields including mineral exploration and production, oil and gas services, and transportation. He currently works with Midnight Sun Mining as Manager of Business and Legal Affairs, and previously served Roxgold Inc. in the same capacity.

Advancing Parallel Mining's Two Gold Projects

To advance the two projects, Parallel Mining has assembled a group of resource sector and mining professionals to take the properties to the next stage of advanced exploration. The Parallel Mining team is lead by John Anderson, an experienced junior exploration expert who has been instrumental in founding and leading a number of resource companies, including Northern Freegold; American Eagle Energy; Huakan International, International Minerals, International Tungsten and Bema Gold.

Parallel Mining Corporate Information

Trading Symbol:	TSX-V: PAL
CUSIP Number:	699179
Shares Outstanding, Fully Diluted:	53,500,000
Market Cap:	\$ 3,477,500
Current Share Price:	\$ 0.065
Audited Financials:	Year End May 31.
Auditor:	Davidson & Company
Transfer Agent:	Computershare

Rakesh Patel, CPA, Chief Financial Officer – Rakesh is a member of the British Columbia Institute of Chartered Professional Accountants and oversees the financial reporting requirements of Parallel Mining Corp. He has over 20 years of experience in the public markets providing assurance services to a varied client base.

Nestor Kinane, M.Geol, Country Manager and Geologist – Nestor began his exploration career in Burkina Faso with Riverstone Resources and Caracal Gold. He worked with Iamgold at their Essakane mine, as a Project Geologist at the Yaramoko high-grade gold deposit, and then as Senior Geologist with Roxgold.
